

Mohammad Moinuddin Kader Chowdhury

Software Engineer

Dhaka-1230, Bangladesh | +8801824249393 | mkshovan@gmail.com | [LinkedIn](#) | [GitHub](#)

OBJECTIVE

Software engineer with 3+ years of experience in C++ development for retail solutions, advanced algorithms, and low-latency APIs. Proficient in payment device integration, TDD, and API scripting with JavaScript and Python. Experienced in integrating different Machine Learning (ML) models with Android and developing cross-platform apps with Flutter. Enthusiastic about AI automation tools, GPTs, MLOps, LLMOps, Cyber Security and Computer Vision. Comfortable with Unix-based systems as well as windows.

SKILLS

Programming Languages	C++, Python, JavaScript, Go, Java, Dart, Bash
Web Development	Django, ReactJS, Express, Node.js
Mobile App Development	Flutter, Android (Kotlin)
Machine Learning Tools	OpenCV, TensorFlow, PyTorch, Sci-kit learn, Kaggle
Database	MongoDB, MySQL, PostgreSQL, Firebase
Design Tools	Adobe Photoshop, Canva, Figma
Tools and Operations	Atlassian Tools, Git, AWS, Docker, K8S, Jenkins, CI/CD Pipeline

EXPERIENCE

Software Engineer Fiftytwo Digital Ltd.	July 2022 - Present Dhaka, Bangladesh
---	--

- Develop and maintain omni-channel retail software using C++ with a focus on test-driven development (TDD)
- Partly implementing advanced tree searching algorithms for optimal applications and multiple loyalty programs
- Design and integrate low-latency APIs bridging servers with cash registers (Till)
- Create and maintain EFT drivers for better compatibility between cash registers and payment terminal devices
- Maintained systems handling 3M+ daily transactions; optimized C++ services and components
- Developed scalable microservices (Javascript, Python, PostgreSQL) and deployed via Docker & AWS
- Collaborated in Agile teams across Denmark & Bangladesh, enhancing cross-cultural teamwork

Android Developer Intern Stamasoft Technologies	Nov 2021 - May 2022 Chittagong, Bangladesh
---	---

- Cooperate with team members to create clean interfaces
- Completed programming and development tasks for UI/UX as well as challenging API and SDK integration
- Integrating Machine Learning models
- Built mobile apps in Flutter/Kotlin, including Firebase-integrated parcel delivery system
- Improved app stability and reduced crashes by 30% through structured testing & debugging.

EDUCATION

- **B.Sc. Engineering in Computer Science and Engineering** Graduated in 2022
University of Chittagong
CGPA: 3.43 out of 4.00 (Exceeding 3.50 on average in last 4 semesters)
- **Higher Secondary Certificate (HSC)** Passing Year 2016
Chittagong College
GPA: 5.00 out of 5.00

ACADEMIC THESIS PROJECT

Patients Action Detection and Early Warning System

I Proposed a system about computer vision-based surveillance for patient monitoring.

- Techniques Used: Deep learning and computer vision.
- Model Components: MobileNetV2, 2D CNN for feature extraction, Gated Recurrent Unit (GRU) for temporal analysis.
- Optimization: Binary cross-entropy loss function for performance improvement.
- Classification: Sigmoid classifier for fall detection.
- Performance: Achieves 99% precision, advancing early warning systems in healthcare settings.

PROBLEM SOLVING

Using different languages and techniques for solving programming problems offline as well as on contests, I have solved-

- 120+ on [LeetCode](#)
- 120+ on [UVA](#)
- 100+ on [HackerRank](#)
- 85+ on [Codeforces](#)

PROJECTS

E-Commerce Site

Built a responsive ecommerce website using Python, Django, PostgreSQL, Bootstrap and StripeAPI where

- Implemented features ensuring proper validation including registration, profile creation and update
- Admin panel for managing products, customers and vendors
- Rating system for sellers after every purchase
- Filtering options to search products by category, price
- Stripe payment system integration
- Tracking orders by purchase ID

Bohon: A Parcel Delivery App

Real-time multiple users supported cross-platform (Flutter) parcel delivery app using-

- Firebase-Auth for authentication
- Google Sign-in for using current google account without registering for new account
- Firestore to store the Salt-encrypted messages. Later, moved to MongoDB
- Push notifications for notify users for new messages or activity
- Embedded real-time chatting system

CERTIFICATIONS

- Advanced Android Development Bootcamp: Stamasoft Tech.
- Generative AI with LLMs (DeepLearning.AI, Coursera)
- Complete Flutter Development: Angela Yu (Udemy)
- Data Science Fundamentals: 365 DataScience
- ITEE by IPA, Japan: Full Passer (November 2021) ID: FE03-0006
- IELTS score: 6.5 (L-7, R- 6.5, W- 6.5, S- 6)
